

**POSITION:** Regional Actuary  
**LOCATION:** Brussels

---

### DESCRIPTION OF THE POSITION

Our client is looking for a Regional Actuary to provide technical and analytical support to the senior staff and to the brokers.

His/her main responsibilities will be the following:

- Support senior staff by providing detailed actuarial analysis
- Organize presentations and discuss findings of the company's analysis to other members/brokers
- Develop and maintain internal actuarial applications, suggest improvement of the existing applications
- Analyse actuarial data needs and translate them into databases
- Data management, data handling and data analysis
- Establish relationships within the company and with industry peers
- Comply with the company's quality insurance procedures and professional standards
- Management of client studies in the modelling tool - MetaRisk
- Automatization of some applications
- Continue to develop knowledge of the company's relevant disciplines
- Participate in Research & Development efforts

---

### PROFILE

- Degree in Actuarial Science, Statistics, or other relevant discipline
- Relevant experience gained in the field of Actuarial/General (Re)Insurance/Statistics
- Knowledge of Non-Life actuarial techniques
- Strong analytical and problem-solving skills
- Good organizational skills
- Good communications skills
- Thorough, professional and confident
- Knowledge of programming skills (VBA, Python, SQL, R) and of database design
- Fluency in Dutch and good knowledge of English (additional languages are not required but would be beneficial)

---
