

Actuary

Lloyd's is transforming and needs curious minds to help define and influence that change. We're looking for people with new perspectives and the confidence to share them, so come and join us.

An actuarial opportunity has opened in Lloyd's Europe based in our Brussels Office, focusing on all aspects of reserving, capital and reporting. As part of a small dynamic & proactive team, you will have the opportunity to influence what is being built, and to collaborate across the company.

[Lloyds Europe – Our base in the heart of Europe](#)

Your accountabilities:

- Undertake the reserving requirements on a quarterly and annual basis across the Lloyd's Europe book of business, on best estimate and Belgian GAAP bases
- Undertake and develop processes to calculate the capital requirements under Solvency II Standard Formula
- Undertake the actuarial aspects of the Solvency II quarterly and annual reporting, Belgian GAAP reporting and other local reporting as required
- Support and develop junior members of the team, providing guidance and technical assistance
- Support the Actuarial Manager in the determining of assumptions and further developing reserving processes
- Undertake capital projections to support the work of Business planning and ORSA processes
- Undertake ad-hoc actuarial investigations and support ongoing projects
- Follow actuarial best practice standards related to review and validation of data, assumption setting, documentation, peer review and remaining up to date on regulatory developments
- Support key stakeholder engagement through communication of actuarial methodologies and results as required, taking the lead with dedicated stakeholders and maintaining strong relationships

Your profile:

- Degree level
- Qualified Actuary and member of a recognized Actuarial professional body
- Knowledge of the actuarial techniques involved in non-life insurance
- Knowledge of standard IT tools including Excel, Access, Word
- Knowledge of programmatic approaches such as R, or reserving specific software ResQ is a strong plus
- Experience in non-life insurance work, preferably across a range of work areas
- Experience in delivering complex work output, including supervising work, and communicating this to an audience
