

POSITION: Actuarial Analyst
LOCATION: Paris, France

DESCRIPTION OF THE POSITION

Our client, an entity of an international insurance group, is looking for an Actuarial Analyst to join its Technical Department.

The future Actuarial Analyst will contribute to the company's economic performance through the monitoring of the technical portfolio management. His/Her main missions will be as follows :

- Ensure the profitability monitoring by producing operating accounts, carrying out statistical studies, producing statistical indicators, identifying loss-making accounts and monitoring recovery measures,
- Produce technical data for the fiscal year by carrying out income statement projections (plans and budget) and monitoring of the claim/premium ratio,
- Participate in the Department's transversal projects.

PROFILE

- Master's degree in Actuarial Science or Statistics,
- At least five years of experience in Non-Life insurance,
- Good command of all the Pack Office tools, especially Excel,
- The command of Business Object and R is considered an asset,
- Strong analytical skills,
- Rigor,
- Team spirit and strong interpersonal skills,
- Fluency in English.
