

POSITION: International Life Actuary
LOCATION: Paris

DESCRIPTION OF THE POSITION

Our client is looking for an International Product Actuary who will report directly to the International Product Actuarial Officer.

The main missions of the actuary are identified as follows:

- Being the International Actuarial Referent at the locations entrusted to him / her and, in this context, providing technical support
- Participating actively in tenders
- Participating in product design or product development work (pricing, modelling and projection of profitability a priori, negotiation with reinsurers and implementation of the reinsurance plan, adaptation of contractual documents, definition of the subscription process, etc.)
- Carrying out provisioning work when the accounts are closed and providing the necessary studies to monitor and analyse the accounts (production of risk indicators, study of changes in claims experience, update of underwriting policies, ...)
- Performing the technical work of the budget process
- Participating in work related to Solvency 2
- Carrying out studies necessary for the creation of new local-sites (market analysis, technical risk analysis and reinsurance).

The actuary will also be involved in other transversal projects, in collaboration with the other Actuarial divisions.

PROFILE

- Post-graduate degree (engineering school, university, etc.)
- At least 3 years of experience in a life and health insurance actuarial position in an international development context
- Solid knowledge in life and health insurance product pricing
- Excellent interpersonal skills
- Rigorous
- Fluent in English.
